

# *Visual Theology*

By Tim Challies & Josh Byers

In a world made up of different personalities, it makes sense that different styles of teaching will hit certain truths home better than others. With the rise of visual media, the population is becoming more prone to learning through the use of sight. *Visual Theology* takes these facts into account and attempts to teach the truth of God with artistic drawings. Large in its truth, small in its size, *Visual Theology* will grow your love for Jesus Christ who is “the image of the invisible God” Col. 1:15.
